INTRODUCTION

The *Psychological Abstracts* journal contains citations, annotations, and abstracts of much of the world's scientific literature on psychology and related disciplines. Each year, materials from over 950 periodicals and 1000 books and other documents are covered. Approximately 25% of these documents were originally published in a foreign language.

This Cumulative Subject Index, published in two volumes, consolidates more than 347,000 references to 77,232 abstract records published in 36 monthly issues of *Psychological Abstracts*, January 1975 through December 1977. A companion work, the Cumulative Author Index, references these records by author and document title.

Entries in this index are in the form of descriptive index phrases, grouped under as many as 10 pertinent index terms selected from the 5000 terms listed in the *Thesaurus of Psychological Index Terms,* and followed by identifying *Psychological Abstracts* volume and record numbers. Under each index term, entries are arranged alphabetically, followed by those entries beginning with numeric characters. The alphabetical order of index phrases may vary due to stylistic changes (e.g., hyphenation and spelling) made over the three years covered by the index. Reference should be made to the list of abbreviations on the following page for additional aid in locating index phrases describing desired concepts, since the alphabetical placement may vary with the use of the abbreviation.

Index phrases for experimental articles include the independent variable(s), dependent variable(s), and the subject population under consideration. Any relevant identifying terms such as book, literature review, or implications not apparent in preceding segments are also included. Commas are used to separate these elements. For nonexperimental articles discussing such topics as theories or problems in psychology, the index phrase may be simply a short statement describing the document.

Inquiries about the 1969–71 and 1972–74 editions of the Cumulative Author and Subject Indexes should be directed to the Publication Sales Department, American Psychological Association, 1200 Seventeenth Street, N.W., Washington, D.C. 20036. Author and subject cumulations previous to 1969 are available from G. K. Hall & Co., 70 Lincoln Street, Boston, Massachusetts 02111. Their main indexes and supplementary editions supply references to records published in *Psychological Abstracts* from 1927 through 1968.
